10 REVANCHE

LES SCIENTIFIQUES : Sur un porte-avions américain, un conclave de scientifiques internationaux est rassemblée. Ils étudient les phénomènes provoqués par Akira. Tetsuo leur rend visite. Il se raille de leur savoir et de leurs certitudes. Que peuvent-ils contre lui et Akira ?

TETSUO : Après s'être moqué des savants, Tetsuo utilise ses pouvoirs pour se téléporter sur la Lune où il crée un gigantesque cratère. Sur Terre, les effets de cette "expérience" provoquent une formidable secousse sismique.

RUY : Le résistant apprend que le Lt Yamada, à qui il a sauvé la vie, est un espion qui a pour mission l'élimination d'Akira. Il évite que le militaire n'utilise une arme bio-chimique qui ferait disparaître la population de Néo-Tokyo.

KANEDA : Il a retrouvé, après une quête éperdue, Kay et parvient à la ramener vers le temple de Lady Miyako. Gravement blessée, la jeune résistante est soignée par le chef religieux. Elle doit accomplir sa mission...
